Ardra will be sending the CRADA and SOW paperwork to you later this afternoon. We considered this "final" from the ORD side, and ready for input from the potential collaborators. I talked with the WaterGen CEO earlier this week. I reviewed our plans (i.e. What's in the SOW) with him, and expressed his strong interest in collaborating on the topics in the SOW.

Jay,

Has there been any progress on the AWG assessment CRADA timeline? Have you heard from WaterGen? We have another call scheduled for tomorrow with the Administrator's office, OW, and OLEM, where I'm sure those questions will come up. Sorry to keep pestering you about this?

Thanks,

Geoff
